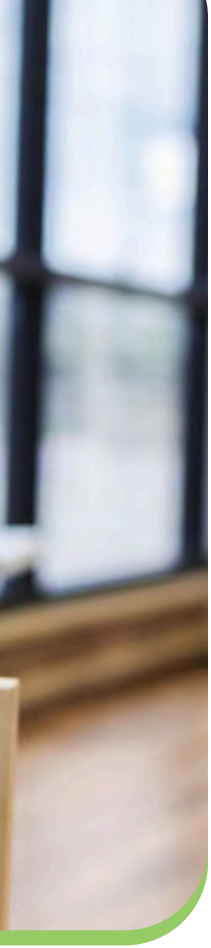
Spring kinderopvang

Children naturally want to play. By guiding this in the right way, your child goes on a discovery journey and learns more about itself and the world around it. With the VVE-programs we offer at Spring, your child will get the right guidance to explore.

What is VVE?

VVE stands for 'pre-school and early childhood education' (in Dutch: voor- en vroegschoolse educatie). This is a collective name for nationally acknowledged methods which playfully stimulate young children in their development. VVE works with themes that are in line with the perception and the daily routine of children. This stimulates children in their broad development, for example in the field of language. Children also develop skills like waiting for your turn, sharing, recognizing colors and counting.



With the right guidance, playing is not only lots of fun, but also very educational.

We raise children together

The VVE-program is characterized by the expert guidance of the pedagogical professionals at our day care and toddler care. In addition, the collaboration with you as a parent is very important. Together with you, the professionals guide your child in its development towards independence.

Besides this, every VVE-location works in close collaboration with the primary school. Together they provide continuous support of child development. For example, in agreement with you as a parent, the day care and toddler care transfer the information relating to your child's development to the primary school. This way children come along well in group 1 (in primary school).

VVE-indication

Children who need some extra help with their development can receive a VVE-indication. The municipality determines whether your child qualifies for this. This is usually arranged by the consultation office. If your child receives a VVE-indication, it can go to our day care or toddler care more frequently. The municipality will pay for these extra hours.

The municipality determines the criteria and the minimum amount of day-parts. The municipality also decides who makes the choice for a VVE-program: the municipality itself, the primary school or the childcare organisation. This is the reason why not all Spring locations work with the same VVE-method.

VVE-locations

Curious about which location in your area you can go to with a VVE-indication? Take a look at www.spring-kinderopvang.nl/vve-locaties. For more information, please contact our customer service on 088 2088 200 or klantenservice@spring-kinderopvang.nl.
